Children's Literature in the Classroom Diane M. Barone
2011-03-08 Many reading programs today overlook an essential component of literacy instruction—helping children develop an enduring love of reading. This authoritative and accessible guide provides a wealth of ideas for incorporating high-quality children's books of all kinds into

K-6 classrooms. Numerous practical strategies are presented for engaging students with picturebooks, fiction, nonfiction, and nontraditional texts. Lively descriptions of recommended books and activities are interspersed with invaluable tips for fitting authentic reading experiences into the busy school day. Every chapter concludes with reflection

questions and suggestions for further reading. The volume also features reproducible worksheets and forms.

The Important Book Margaret Wise Brown 1990-03-10 The important thing about The Important Book -- is that you let your child tell you what is important about the sun and the moon and the wind and the rain and a bug and a bee and a chair and a table and a pencil and a bear and a rainbow and a cat (if he wants to). For the important thing about The Important Book is that the book goes on long after it is closed. What is most important about many familiar things -- like rain and wind, apples and daisies -- is suggested in rhythmic words and vivid pictures. 'A perfect book . . . the text establishes a word game which tiny children will accept with glee.' -- K.

How to Reach and Teach All Children Through Balanced Literacy Sandra F. Rief, M.A. 2007-08-17 How to Reach and Teach All Children Through Balanced Literacy offers you a handbook for teaching literacy

to diverse students in grades 3-8. The balanced literacy method combines the best practices of phonics and other skill-based language instruction with the holistic, literature-based approach in order to help you teach reading, writing, and speaking in a clear and approachable format. This dynamic resource offers an easily accessible research-based approach to balanced literacy that is grounded in the innovative ideas developed by authors Sandra F. Rief and Julie A. Heimburge. The book includes detailed descriptions of what a balanced literacy classroom looks like and shows how to create a program from the ground up or give your existing program a boost. The book can be used across content areas and is filled with reproducible worksheets, activities, and other handy classroom tools. Some topics covered include: Shared book experiences Reading aloud Oral language and vocabulary development Guided reading for comprehension Modeled writing Reading and writing

Situating Children of Migrants across Borders and Origins

Claudio Bolzman
2017-10-25 This open access wide-ranging collation of papers examines a host of issues in studying second-generation immigrants, their life courses, and their relations with older generations. Tightly focused on methodological aspects, both quantitative and qualitative, the volume features the work of authors from numerous countries, from differing disciplines, and approaches. A key addition in a corpus of literature which has until now been restricted to studying the childhood, adolescence and youth of the children of immigrants, the material includes analysis of longitudinal and transnational efforts to address challenges such as defining the population to be studied, and the difficulties of follow-up research that spans both time and geographic

space. In addition to perceptive reviews of extant literature, chapters also detail work in surveying the children of immigrants in Europe, the USA, and elsewhere. Authors address key questions such as the complexities of surveying each generation in families where parents have migrated and left children in their country of origin, and the epistemological advances in methodology which now challenge assumptions based on the Westphalian nation-state paradigm. The book is in part an outgrowth of temporal factors (immigrants' children are now reaching adulthood in more significant numbers), but also reflects the added sophistication and sensitivity of social science surveys. In linking theoretical and methodological factors, it shows just how much the study of these second generations, and their families, can be enriched by evolving methodologies. Children and Biography Kate Douglas 2022-08-25 The first study of life narratives produced for, about, and written by children, this book examines the recent popularity of children's biographies and how they engage with the biggest issues of our time: environmental change, health crises, education, and children's personal and political development. Beginning with a literary-historical overview, *Children and Biography* proceeds to examine 21st-century examples and trends such as illustrated texts including *Women in Science*, *the Fantastically Great Women Who...* books, *Rebel Dogs*, *Goodnight Stories for Rebel Girls*, *Kids Who Did*, *My Beautiful Birds* and *The Journey*. The book also considers archives of children's writings and drawings, in particular the testimonies of child asylum seekers, children's biographical

art, and 'Lockdown diaries' produced during the Covid-19 pandemic. By analyzing these works alongside empirical studies into how such material is received by child readers, and how texts generated by children are perceived both by them and their parents, this book provides new knowledge on how biographies for children are produced and read. Comprehensive and original, *Children and Biography*, presents an ethical methodological framework for scholarly practice when reading, witnessing and interpreting children's life narratives. The book offers a mandate for future researchers: to place children's voices and writing at the centre of inquiries in ways that facilitate genuine agency for child authors. Helping Your Children with Reading and Writing at

Home Mary A. Colbert &
William P. Colbert 2009-01-31
Helping Your Children with
Reading and Writing at Home
By Mary Ann Colbert & Dr.
William P. Colbert There really
is no place like home when it
comes to developing competent
readers and writers. And with
the aid of our new world
changing guide the process and
the goal of developing lifelong
readers and writers will be
greatly facilitated. Many years
ago we set about finding out
what type of reading and
writing help parents and other
adults were giving children and
how it was working, We asked
everyone and anyone who
would talk with us and we came

up with some rather startling
information to share in our
guide. Now talking with
parents, grandparents. adults
and children about the reading
and writing activities they have
experienced at home is second
nature to us. Through the
years, we have discovered that
a great many things are
happening in American homes
relative to helping children in
these areas and even greater
things are possible. The
purpose of our book (We like to
call it a guide.) is to awaken
parents. grandparents and
other adults, who work with
children, to the great
possibilities that are open to
them that will revolutionize
learning now and for future
generations. The ideas,
suggestions and strategies in
our guide step off from the
interests of the learners (which
are the best indicators of what
the children are ready and able
to learn next) as opposed to
curriculums and textbooks
which often have an iron grip
on what is available for young
students to learn. We show our
readers how to take advantage

of the great knowledge they have about their children and how to use it to guide their children's learning., and, more especially. to identify what is the next appropriate step for their children to take in their learning. All this is done in the home setting with family members participating and sharing the fruits of their learning labors. Besides giant leaps in learning, families can expect outstanding growth in family interpersonal relationships. The family is actually drawn closer together by sharing their diverse interests.. At the onset of the guide adults are asked to compare their thinking on reading and writing learning with some of the experts in the field via a true-false checklist. This technique totally involves parents with the book from the start. and parents are often surprised to see how their thinking coincides with experts in the field. The next section contains three case studies that illustrate, in detail, exactly what some very effective adults did to further the reading and

writing skills of the children with whom they worked. The third sections contain some precise strategies that parents and other adults can begin using today with their children. The next sections identifies what children see as effective reading and writing strategies that are used by parents and their teachers. Section five is a summary of some ideas of some great teachers of reading and writing. The ideas here are undergirded by some sound learning principles which every adult, who works with children, will want to know about. The final section ends much like the guide begins with a checklist of some true - false items that will help guide parents and other adults to increasing success in helping their children with reading and writing at home.

Educational Method 1925 Teaching Gifted Learners in STEM Subjects Keith S. Taber 2017-07-31 This book offers an overview of programmes designed to support the learning of gifted and talented students in STEM subjects, both to allow them to meet their

potential and to encourage them to proceed towards careers in STEM areas. The chapters from a range of national contexts report on perspectives, approaches and projects in gifted education in STEM subjects. These contributions provide a picture of the state of research and practice in this area, both to inform further research and development, and to support classroom teachers in their day-to-day work. Chapters have been written with practitioners in mind, but include relevant scholarly citations to the literature. The book includes some contributions illustrating research and practice in specific STEM areas, and others which bridge across different STEM subjects. The volume also includes an introductory theoretical chapter exploring the implications for gifted learners of how 'STEM' is understood and organized within the school curriculums.

Official Portraits and Unofficial Counterportraits of At Risk" Students" Richard J. Meyer 2010-01-15 This book chronicles 5th and 6th grade writers in a poor, culturally diverse, rural school in the southwest US coming into their voices, cultivating those voices, and using those voices in a variety of venues, beginning with the classroom community and spreading outward. The big ideas of official and unofficial portraits are presented, followed by data and facets of the theoretical construct of counterportraits in each chapter, as a response to official portraits.

Children's Biographies of African American Women

Sara C. Vanderhaagen
2018-11-15 In Children's Biographies of African American Women: Rhetoric, Public Memory, and Agency Sara C. VanderHaagen examines how these biographies encourage young readers to think about themselves as agents in a public world. Specifically VanderHaagen illustrates how these works use traditional means to serve progressive ends and thereby examines the rhetorical power of biography in shaping identity and promoting public action. Drawing on scholarship in rhetoric, memory studies, and children's literature, VanderHaagen presents rhetorical analyses of biographies of three African American women—poet Phillis Wheatley, activist Sojourner Truth, and educator-turned-politician Shirley Chisholm—published in the United States during the twentieth and twenty-first centuries. VanderHaagen begins by analyzing how biographical sketches in books

for black children published during the 1920s represent Wheatley and Truth. The study then shifts to books published between 1949 and 2015. VanderHaagen uses a concept adapted from philosopher Paul Ricoeur—the idea of the "agential spiral"—to chart the ways that biographies have used rhetoric to shape the life stories of Wheatley, Truth, and Chisholm. By bringing a critical, rhetorical perspective to the study of biographies for children, this book advances the understanding of how lives of the past are used persuasively to shape identity and encourage action in the contemporary public world. VanderHaagen contributes to the study of rhetoric and African American children's literature and refocuses the field of memory studies on children's biographies, a significant but often-overlooked genre through which public memories first take shape.

this Caldecott Medal-winning

picture book, the true story of

Wilson Bentley and his singular

fascination with snowflakes is

rendered in rich prose and

gorgeous artwork, perfect for

the holidays, snow days, and

everyday. Wilson Bentley was

always fascinated by snow. In

childhood and adulthood, he

saw each tiny crystal of a

snowflake as a little miracle and wanted to understand them. His parents supported his curiosity and saved until they could give him his own camera and microscope. At the time, his enthusiasm was misunderstood. But with patience and determination, Wilson catalogued hundreds of snowflake photographs, gave slideshows of his findings and, when he was 66, published a book of his photos. His work became the basis for all we know about beautiful, unique snowflakes today. This biographical tribute to a very special farmer is the perfect holiday gift or snow day read.

Learning from the Left Julia L. Mickenberg 2005-11-10 At the height of the Cold War, dozens of radical and progressive writers, illustrators, editors, librarians, booksellers, and teachers cooperated to create and disseminate children's books that challenged the status quo. *Learning from the Left* provides the first historic overview of their work. Spanning from the 1920s, when both children's

book publishing and American Communism were becoming significant on the American scene, to the late 1960s, when youth who had been raised on many of the books in this study unequivocally rejected the values of the Cold War, *Learning from the Left* shows how "radical" values and ideas that have now become mainstream (including cooperation, interracial friendship, critical thinking, the dignity of labor, feminism, and the history of marginalized people), were communicated to children in repressive times. A range of popular and critically acclaimed children's books, many by former teachers and others who had been blacklisted because of their political beliefs, made commonplace the ideas that McCarthyism tended to call "subversive." These books, about history, science, and contemporary social conditions—as well as imaginative works, science fiction, and popular girls' mystery series—were readily available to children: most could be found in public

and school libraries, and some could even be purchased in classrooms through book clubs that catered to educational audiences. Drawing upon extensive interviews, archival research, and hundreds of children's books published from the 1920s through the 1970s, *Learning from the Left* offers a history of the children's book in light of the history of the history of the Left, and a new perspective on the links between the Old Left of the 1930s and the New Left of the 1960s. Winner of the Grace Abbott Book Prize of the Society for the History of Children and Youth

Biography of Veer Savarkar: Inspirational Biographies for Children Kavita Garg

2021-02-01 Vinayak Damodar Savarkar was a brave and staunch patriot. He was born on 28th of May, 1883, in a village called Bhagoor near Nasik in Maharashtra. His parents were from a middle-class background. His mother, Radhabai was a religious lady. She was extremely kind and honest. His father, Pt. Damodar

Pant was known far and wide for his knowledge. As a child, Savarkar used to be called ÔTatyaÕ by the family members. Mother Radhabai used to call her son ÔVinayakÕ with great affection. Vinayak, the little boy, was brought up with great love and care. Due to the religious environment at home, the child used to get a lot of opportunities to regularly listen to the chapters from the Ramayana and the Gita. This had a deep impact on his life. *Jungle Night (comes with 2 free audio downloads, Yo-Yo Ma, cello)* Sandra Boynton

animal snore interpreted by the expressive, playful cello of Yo-Yo Ma. He even does the elephant's stop-the-show snore—though admittedly that took Ma's cello PLUS the classic horn salute of the James R. Barker steamship. (Seriously.) All of this fabulousness leads into the coolest lullaby ever: "Jungle Gymnopédie No. 1", a polyrhythmic jungly arrangement by Boynton of Erik Satie's renowned piece, with Yo-Yo Ma on cello, guitar played by Ron Block of Alison Krauss Union Station, and drums by Kevin MacLeod. "Yo-Yo and I chose this piece because it's the most gorgeous and mesmerizing night song imaginable," explains Boynton. "And there was surely nothing else that could get those animals back to sleep after that elephant blast."

Children's and Young Adult Literature Shelby Wolf

2011-04-27 This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and

community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory.
