William R. Collings

Dorothy Langdon Yates

1985 Forty years after Dow Corning Corporation was founded, a group of us, all veteran employees, fell to discussing the good old days. Incidents involving Dr. William R. Collings, the company's pioneer leader, kept coming up. As we compared notes we realized that ours had been a unique

opportunity-to participate in the birth and growth of this new company. Equally, we appreciated our experience of knowing and working with an entrepreneurial manager. What were the characteristics of this unusual person and why was he outstandingly effective? We decided to capture his style by collecting anecdotes from all ranks of his workers and associates. These real life stories illustrate his ways of dealing with the start-up of a new company. The momentum from the early days has accelerated under the Presidents who followed Collings: Shailer L. Bass, William C. Goggin, John S. Ludington, and currently, Lawrence A. Reed. Dow Corning Corporation is today approaching a billion dollars in annual sales. We have presented the Collings stories so as to be of special interest and help to students of business working to formulate a leadership style. New

employees joining Dow Corning who may have assumed that progress is automatic will here glimpse the trials and triumphs of the remarkable beginnings of a great company. In addition, we trust that our customers and suppliers, businessmen, and the general public will all find these recollections both interesting and provocative, contributing to an understanding of the personal dimension of business. Readers of the book will have touched our roots and breathed some of the air that made living and working with the pioneer leader of Dow Corning Corporation as the enterprise was launched both challenging and fun.--- from the Preface.

My Job Suzanne Skees
2019-03-12 What Does It Mean to Have a Job? In book two of the series "My Job: Real People at Work Around the World," author Suzanne Skees profiles fifteen professionals from

all corners of the globe, seeking to understand how our work shapes our lives. The fascinating people that Skees meets work in all kinds of industries: health and recovery, education and finance, agribusiness and processing, tourism and culture, and diplomacy and peace. MY JOB explores the dignity, identity, economic viability, and inherent challenges of each occupation, asking such provoking questions as: How has the definition and notion of a job shifted in recent years? How does one land in a particular job, and what causes one to flourish or flounder in it? How does our job shape our sense of identity? As Skees explores how our experiences, interests, and views help determine the career we pursue and how the career, in turn, continues to shape our identity, readers just may discover that while the fields, countries, and cultures we work in are different, the intricate ways

in which our work effects our lives are universal.
