*Breath* James Nestor 2020-05-26 A New York Times Bestseller A Washington Post Notable Nonfiction Book of 2020 Named a Best Book of 2020 by NPR "A fascinating scientific, cultural, spiritual and evolutionary history of the way humans breathe—and how we've all been doing it wrong for a long, long time." —Elizabeth Gilbert, author of *Big Magic* and *Eat Pray Love* No matter what you eat, how much you exercise, how skinny or young or wise you are, none of it matters if you're not breathing properly. There is nothing more essential to our health and well-being than breathing: take air in, let it out, repeat twenty-five thousand times a day. Yet, as a species, humans have lost the ability to breathe correctly, with grave consequences. Journalist James Nestor travels the world to figure out what went wrong and how to fix it. The answers aren't found in pulmonology labs, as we might expect, but in the muddy digs of ancient burial sites, secret Soviet facilities, New Jersey choir schools,

and the smoggy streets of São Paulo. Nestor tracks down men and women exploring the hidden science behind ancient breathing practices like Pranayama, Sudarshan Kriya, and Tummo and teams up with pulmonary tinkerers to scientifically test long-held beliefs about how we breathe. Modern research is showing us that making even slight adjustments to the way we inhale and exhale can jump-start athletic performance; rejuvenate internal organs; halt snoring, asthma, and autoimmune disease; and even straighten scoliotic spines. None of this should be possible, and yet it is. Drawing on thousands of years of medical texts and recent cutting-edge studies in pulmonology, psychology, biochemistry, and human physiology, *Breath* turns the conventional wisdom of what we thought we knew about our most basic biological function on its head. You will never breathe the same again.

**Margaret Mee's Amazon** Margaret Mee 2004 For thirty-two years, the artist Margaret Mee was enchanted by and lured back again and again to the massive, unpredictable and fertile rainforests of Amazonas. Her initial objective, to search out and illustrate the glorious flora growing in the tree canopies and along the innumerable waterways of the great rivers of the Amazon

basin, was later combined with a growing concern at the commercial plunder of the great forests. Her first expedition to Amazonas was in 1956 and it was then that she began to keep the diaries that, along with her paintings, drawings and sketches, make up this book. Between expeditions, some of which lasted for up to four months, Margaret returned home to Sao Paulo, to teaching commitments, and to her own painting. Unpredictable weather, transport and guides meant she often had to make hurried in situ sketches (always meticulously annotated) which she later worked up into coloured sketches and finished paintings. In the autumn of 1988, just after what was sadly to be her last expedition, Margaret came to England to lecture to the Royal Geographic Society and attend the opening of an exhibition of her paintings, Margaret Mee's Amazon, at the Royal Botanic Gardens, Kew. It is ironic that this enthusiastic lover of the Amazon, who had braved so many hazardous and alarming situations, was killed in a car crash in
