Assessment and Learning in Content and Language Integrated Learning (CLIL) Classrooms

Mark deBoer 2020-11-17 This volume builds a conceptual basis for assessment promoting learning in Content and Language Integrated Learning (CLIL) classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom. CLIL as an educational context is unique, as language and content learning happen simultaneously. The efficacy of such instruction has been studied extensively, but assessment in CLIL classrooms has drawn much less attention. The present volume aims to fill this gap. Arranged based on different ways that content and language are integrated in CLIL, the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms. The authors discuss how assessment eliciting this integration yields insights into learners' abilities, but more importantly, how these insights are used to promote learning.

The contributors to the volume together build the understanding of classroom-based assessment as cyclic, of teaching, learning, and assessment as inter-related, and of content and language in CLIL classrooms as a dialectical unity. This volume will spark interest in and discussion of classroom-based assessment in CLIL among CLIL educators and researchers, enable reflection of classroom assessment practices, and foster collaboration between CLIL teachers and researchers. The assessment approaches and activities discussed in the volume, in turn, will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms.

Neoliberal Bodies and the

Gendered Fat Body Hannele

Harjunen 2016-08-25 In recent decades the rise of the so-called "global obesity epidemic" has led to fatness and fat bodies being debated incessantly in popular, professional, and academic arenas. Fatness and fat bodies are shamed and demonised, and the public monitoring, surveillance and outright policing by the media, health professionals, and the general public are pervasive and socially accepted. In Neoliberal

Bodies and the Gendered Fat Body, Hannele Harjunen claims that neoliberal economic policy and rationale are enmeshed with conceptions of body, gender, and health in a profound way in contemporary western culture. She explores the relationships between fatness, health, and neoliberal discourse and the role of economic policy in the construction of the (gendered) fat body, and examines how neoliberal discourses join patriarchal and biomedical constructions of the fat female body. In neoliberal culture the fat body is not just the unhealthy body one finds in medical discourse, but also the body that is costly, unproductive and inefficient, failing in the crucial task of self-management. With an emphasis on how neoliberal governmentality, in its many forms, affects the fat body and contributes to its vilification, this book is essential reading for scholars of feminist thought,

sociology, cultural studies and social theory with interests in the body, gender and the effects of neoliberal discourse on social attitudes.

Digital Histories Mats Fridlund 2020-12-07 Historical scholarship is currently undergoing a digital turn. All historians have experienced this change in one way or another, by writing on word processors, applying quantitative methods on digitalized source materials, or using internet resources and digital tools. *Digital Histories* showcases this emerging wave of digital history research. It presents work by historians who – on their own or through collaborations with e.g. information technology specialists – have uncovered new, empirical historical knowledge through digital and computational methods. The topics of the volume range from the medieval period to the present day, including various parts of Europe.

The chapters apply an exemplary array of methods, such as digital metadata analysis, machine learning, network analysis, topic modelling, named entity recognition, collocation analysis, critical search, and text and data mining. The volume argues that digital history is entering a mature phase, digital history ‘in action’, where its focus is shifting from the building of resources towards the making of new historical knowledge. This also involves novel challenges that digital methods pose to historical research, including awareness of the pitfalls and limitations of the digital tools and the necessity of new forms of digital source criticisms. Through its combination of empirical, conceptual and contextual studies, *Digital Histories* is a timely and pioneering contribution taking stock of how digital research currently advances historical scholarship.

Literature and Society Pamela J.

Annas 1999-08 An enriching introduction to the diverse and exciting world of literature, this anthology offers a broad collection of short fiction, poetry, drama and nonfiction selections written by a

diverse group of writers who represent different social classes, races, genders, cultures, and sexual orientations. Organizes selections around five socially relevant themes—Growing Up and Growing Older; Women and Men; Money and Work; Peace and War; and Varieties of Protest. Shows how literary technique serves larger purposes—the recreation of experience, the exploration of ideas, the analysis of social issues—and how these larger purposes themselves shape literary form. Explains the ways in which literary form creates meaning, and provides a strong emphasis on writing about literature throughout, with a full chapter on all stages of the writing process—generating ideas, developing a thesis, discovering a form, drafting, revising, and editing—plus numerous excerpts from sample papers and journals. Now contains 42 new works, with more by Native American and

Latino/Latina writers, as well as Bertolt Brecht's play *Mother Courage and Shakespeare's Othello*; also includes 18 works of nonfiction prose that have been chosen both for their literary technique as well as for their exploration of the five major themes.

and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Agile Testing John Watkins

2009-07-27 In an IT world in which there are differently sized projects, with different applications, differently skilled practitioners, and on-site, off-site, and off-shored development teams, it is impossible for there to be a one-size-fits-all agile development and testing approach. In addition to descriptions of the prominent agile methods, the book provides twenty real-world case studies of practitioners using agile methods and draws upon their experiences to propose your own agile method; whether yours is a small, medium, large, off-site, or

even off-shore project, this book provides personalized guidance on the agile best practices from which to choose to create your own effective and efficient agile method.

Miracle of Education Hannele Niemi 2016-11-25 "Finnish pupils' success in international student assessment tests and the characteristics of the Finnish educational system are the focus of interest all around in the world. The significance of Finnish educational policy and societal atmosphere are continuously discussed. This book provides explanations, answers and reflections to these questions. Over 30 expert authors have contributed to this book by bringing their own specific research-based points of view. The second edition of the book introduces the new national curriculum for basic education that now provides guidelines for school-based curricula. Students' learning with engagement and

schools as learning communities are core visions of the reform. The authors also reflect on the PISA 2012 results. The book gives an example on how to use PISA information for national improvements. In Finland, all evaluations are enhancement-led and this also includes PISA measurements. The book illustrates how teaching and learning of different subjects is realized in Finnish schools and describes the essential characteristics and methods of teaching, learning materials and research on these issues. The book provides important insight and reflections to international researchers, teachers, students, journalists and policy makers, who are interested in teaching and learning in Finnish schools. It shows the results of the systematic and persistent work that has been done on education and schooling in Finland. The main features of education in Finland are: Strong equity

policy. Teachers as autonomous and reflective academic experts. Flexible educational structures and local responsibility for curriculum development. Evaluation for improvements, not for ranking. No national testing, no inspectorate. Research-based teacher education. Teachers' high competence in content knowledge and pedagogy. Trust in education and teachers."
