Business Mathematics in Canada F. Ernest Jerome 2017-01-19 Jerome/Worswick, Business Mathematics in Canada is a market leader for introductory business mathematics or mathematics of finance courses that are taught in the business administration programs. Jerome/Worswick supports the learning of math for students, with student-centered content and pedagogy, along with innovative technology. The Ninth Edition provides a wealth and variety of problem material helping to build student math confidence so they may succeed in fields such as accounting, finance, management/business, marketing, personal financial planning, and business information systems. Jerome/Worswick is adaptable to either a one or a two semester course in business math and is suitable to a course that emphasizes either an algebraic approach or a pre-programmed financial calculator approach to compound interest problems. Jerome/Worswick recognizes that for students to learn business math and to succeed they must do business math - so it provides a balanced approach - from the review of basic algebra to the more intermediate and advanced concepts that are found in this 16 chapter text.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach

to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

**Essentials of Contemporary Management**

Gareth R. Jones 2007 Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. Essentials of Management concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a

career.
